Servers Have Become
Commoditized

This Talk is About **Serverless** Computing

Quick History Lesson

We used to **own** the servers

Then we moved everything to the **cloud**!

Who needs **DevOps**?

a.k.a Platform as a Service

Software as a Service

Server as a Service

Serverless, Microservices, Cloud Functions, Functions as a Service, etc.

Serverless: Someone else's servers ;)

Autoscale + no idle costs - **Rob Mensching**

Examples:

- Webtasks
- Cloud Functions
- AWS Lambda
- **SaaS applications**

Introducing **Webtask.io**

All you need is code

How does it **work**?

1. **Install** the Webtask CLI

```
npm install wt-cli
```

2. **Setup** your profile

```
wt init
```

3. **Write** your code

```
wt edit
```

4. Build
